

HWCDSB Asymptomatic Testing

St. Jean de Brébeuf Hub Clinic

When: Saturday, March 20, 2021 – 9:00am - 3:00pm

Where: **St. Jean de Brébeuf Catholic Secondary School**
200 Acadia Drive., Hamilton, ON L8W 1B8

Walk-in registration

Participants are able to walk-in to the location during the allocated testing times. Children under the age of 18 will need to bring a signed and completed parent consent form (a form is attached to this letter).

Why is asymptomatic testing being recommended?

In addition to daily screening, masking and other health and safety measures, targeted testing for students and staff in schools is an important and additional layer of protection that is helping to limit the spread of COVID-19 in our schools and community.

Who is eligible for asymptomatic testing?

Testing will continue to be voluntary for students and staff, and consent will be required from parents or guardians for students under 18 years old. Students and staff from the following schools, as well as all children and staff of child care and before-and after school care programs associated with the following schools, are eligible for asymptomatic testing:

- **Blessed Sacrament CES**
- **Our Lady of Lourdes CES**
- **Sacred Heart of Jesus CES**
- **St. Anthony Daniel CES**
- **St. John Paul II CES**
- **St. Kateri Tekakwitha CES**
- **St. Margaret Mary CES**
- **St. Marguerite d'Youville CES**
- **St. Teresa of Calcutta CES**

What can I expect to happen at the test site?

Our Goal = less discomfort

The test process is very simple and safe, and the collection site will be staffed by professionals who will be following a multitude of safety parameters. LifeLabs uses a swab similar to a Q-tip that is inserted into the front part of the nostril and rotated for 15 seconds (per nostril). [Learn more about this testing method.](#)

Accessing your test results

If an OHIP number has been provided at the time of check-in/registration, results will be uploaded to covid19results.ehealthontario.ca. Any positive results will get a call from the LifeLabs clinical team and Hamilton Public Health Services (HPHS).
